避難所にいる子どもへの気配りをお願いします

Please show consideration to children in evacuation shelters

Due to the current disaster, some children have become separated from their parents and spend their time only with the children all day long. Please take notice of the children around you for whether they are with their parents and talking to them, or if they don't have their parents or anyone else to take care of them.

It comforts children when adults talk calmly to and listen to them carefully.

To prevent children from feeling lonely during such times it is important to give them some simple tasks to do that they can complete easily, comfortably and completely (that give them a sense of accomplishment through which they can be reassured of their importance).
