序

(財)自治体国際化協会及び政策研究大学院大学では、平成 17 年度より「自治制度及び運用実態情報海外紹介等支援事業」を実施しています。同事業は、現在、海外に対する我が国の自治制度とその運用の実態に関する情報提供が必ずしも十分でないとの認識の下、我が国の自治制度とその運用の実態に関する外国語による資料作成を行うとともに、国内外の地方自治に関する文献・資料の収集などを行うものです。

平成 22 年度には、前年に引き続き、『自治関係の主要な統計資料の英訳』、『アップ・トゥー・デートな自治関係の動きに関する資料』、『分野別自治制度及びその運用に関する説明資料』、『我が国の地方自治の成立・発展』の作成を行うとともに、比較地方自治研究センターに収蔵すべき国内外の地方自治関係文献・資料の調査を行いました。

本事業にご尽力頂いた研究委員会の委員各位、またご意見、ご協力頂いた方々に心より感謝申し上げます。

Foreword

The Council of Local Authorities for International Relations (CLAIR) and the National Graduate Institute for Policy Studies (GRIPS) have been working since FY 2005 on a “Project on the overseas dissemination of information on the local governance system of Japan and its operation”. On the basis of the recognition that the dissemination to overseas countries of information on the Japanese local governance system and its operation was insufficient, the objective of this project was defined as the pursuit of comparative studies on local governance by means of compiling in foreign languages materials on the Japanese local governance system and its implementation as well as by accumulating literature and reference materials on local governance in Japan and foreign countries.

In FY 2010 we continued to compile “Statistics on Local Governance (Japanese/English)”, “Up-to-date Documents on Local Autonomy in Japan”, “Papers on the Local Governance System and its Implementation in Selected Fields in Japan” and “Historical Development of Japanese Local Governance”. We also continued to conduct a search for literature and reference materials concerned with local governance in Japan and overseas to be stored in the Institute for Comparative Studies in Local Governance (COSLOG).

We would like to express our sincere appreciation to the members of research committee on “Project on the overseas dissemination of information on the local governance system of Japan and its operation” for their considerable efforts, and to all who offered valuable advice and cooperation to this project.

Preface

This booklet “Statistics on Local Governance (Japanese / English)” was produced in fiscal year 2010 as one of the activities for the Project on the Overseas Dissemination of Information on the Local Governance System of Japan and its Operation. This project is a joint project with the National Graduate Institute for Policy Studies and Council of Local Authorities for International Relations (CLAIR) which was started in fiscal year 2005. For this project a research committee was created, and a chief and deputy chiefs are assigned for each activity. As the process of compiling this booklet, we first selected statistical materials relevant for translation into English, and then translated and compiled them together with their originals in Japanese. The reference source used for the determining the terms were the “New Japanese-English Comprehensive Dictionary of Civil Service Terms” (edited by Sendai Shiyakusho Koumu Eigo Kenkyu Kai, published by Gyousei, 2003), “Local Government in Japan 2008” (edited and published by the Council of Local Authorities for International Relations, 2010), Official Gazettes of Japan (English version), and etc.

The following table lists the materials which were translated in fiscal year 2010. These materials are the fiscal year 2009 editions revised with updated data on previously translated materials.

In addition, in fiscal year 2010, we revised two kinds of glossaries which are included as content in the above table. The first is a glossary of 75 terms used in the “White Paper on Local Public Finance (FY2010). The second is a glossary of terms used in the “Disclosure of Information on Local Public Employees’ Compensation” (48 terms).

Finally, I would like to express my sincere appreciation to Associate Professor Eisuke Hatakeyama and Mr. Shuji Mayama, who worked on this booklet, and to the other members of the research committee for their valuable input.

Note 1: The figures for ordinary balance ratio, net balance ratio, and financial capability indicator in the columns of municipalities and total are calculated excluding data for special wards and partial-affairs-associations, and the figures for their debt service burden ratio are calculated including data for these bodies. The figures for real debt service ratio and debt service ratio don't include data for partial-affairs-associations. This rule also applies to Section 2.

Note 2: The figures for ordinary balance ratio, net balance ratio, real debt service ratio, debt service burden ratio and debt service ratio are weighted averages, and the figures for financial capability indicator are simple averages. However, the figures for real debt service ratio, debt service burden ratio and debt service ratio in parenthesis for FY 1998 and the following years are simple averages.

Note 3: The real debt service ratio for FY2007 and FY2008 is calculated in accordance with the law relating to the financial soundness of local government. The part of the method of the calculation has changed since FY 2007.

グループ	A	B	C	D	E
財政力指数	1.0以上の団体	0.5~1.0の団体	0.4~0.5の団体	0.3~0.4の団体	0.3未満の団体

(2) 東京都の地方税については、上記8交付金のほかに特別区財政調整交付金を除いたものである。

なお、()内の数値は、東京都の地方税に都が徴収した市町村税相当額が含まれていることを考慮し、上記8交付金のほかに当該市町村税相当額を除いたものを計上している。

3 人口1人当たり額は、平成21年3月31日現在住民基本台帳登録人口で除して得た額である。その2において同じ。

Note 1: The group classification is as follows:

groups	A	B	C	D	E
financial capability indicator	1.0 and over	from 0.5 to 1.0	from 0.4 to 0.5	from 0.3 to 0.4	below 0.3

Note 2 (1) Except for the Tokyo Metropolitan Government, the amounts of local taxes exclude the amounts granted to municipalities as grant from interest-based prefectural inhabitant tax, grants from the dividend levy of prefectural inhabitant tax, grants from the levy on capital gain from stocks, local consumption tax grant, grant from tax on usage of golf facilities, special local consumption tax grant, automobile acquisition tax grant, and light oil delivery tax grant (hereinafter collectively referred to as "the 8 grants").

(2) The amounts of local taxes for the Tokyo Metropolitan Government exclude financial equalization grant to special wards as well as the 8 grants above. Taking into consideration that the amounts of local taxes for the Tokyo Metropolitan Government include revenues from taxes which are ordinarily classified as municipal taxes but collected by the Tokyo Metropolitan Government, figures in the parentheses show the amounts after deducting those tax revenues in addition to the 8 grants above.

Note 3: The per capita amounts are calculated by dividing the total amounts by the population registered on basic resident registers as of March 31, 2009. This also applies to Section 2.

注) 1 国内総支出は、内閣府経済社会総合研究所の推計により、平成10年度以降は「国民経済計算(93SNA)」、昭和36年度は「国民経済計算(68SNA)」、昭和10年度及び16年度は「国民経済計算(53SNA)」によっており、いずれも名目値である。ただし、昭和10年度及び16年度は国民総支出の数値である。

2 国の歳出額は、平成20年度については、一般会計と交付税及び譲与税配付金特別会計、エネルギー対策特別会計、年金特別会計(児童手当勘定のみ)、食料安定供給特別会計(国営土地改良事業勘定のみ)、国有林野事業特別会計(旧治山勘定の一部)、社会資本整備事業特別会計の6特別会計との純計決算額であり、平成19年度以前においても、一般会計とこれらの特別会計に相当する特別会計との純計決算額である。

3 「国から地方に対する支出」は、地方交付税(地方分与税、地方財政平衡交付金、臨時地方特別交付金及び特別事業債償還交付金等を含む。)、地方特例交付金等、地方譲与税及び国庫支出金(交通安全対策特別交付金、国有提供施設等所在市町村助成交付金及び地方債のうち特定資金公共投資事業債を含む。)、の合計額であり、地方の歳入決算額より、地方の歳入決算額を引いたものである。

4 「地方から国に対する支出」は、地方財政法第17条の2の規定による地方公共団体の負担金(地方の歳入決算額中、国直轄事業負担金に係る国への現金納付額及び国の交付公債の元利償還額の合計額)である。

5 決算額からは、特定資金公共投資事業債償還補助金及び同補助金と相殺された償還金を除いている。

Note 1 : The figures for Gross Domestic Expenditure are shown at current prices and estimated by the Economic and Social Research Institute of the Cabinet Office on the basis of 93SNA for 1998 and the following fiscal years, 68SNA for FY1961 and 53SNA for FY 1935 and 1941. For FY 1935 and 1941, however, the figures are those of gross national expenditure.

Note 2 : The amount of national expenditure for 2008 is the net total of settled accounts including the general account and the following 6 special accounts; "local allocation tax and local transfer tax," "energy measure," "pension (only child allowance sub-account)," "stable food supply (only national land improvement projects sub-account)," "national forest service (part of former erosion control sub-account)," "social infrastructures improvement." For FY 2007 and the previous fiscal years, the amount of national expenditure is the net total of settled accounts of the general account and the special accounts corresponding to the above 6 special accounts.

Note 3 : "Payment from national to local" is a total of "local allocation tax" (including "local apportionment tax", "local finance equalization grant", "temporary special local grant" and "grant for the redemption of a special works loan" etc.), "special local grant and similar grants", "local transfer tax" and "national government disbursements" (including "special grant for traffic safety", "municipal charge on military bases", "public works loan financed by specific funds"). It is based on the amount of settled accounts of local revenue.

Note 4 : "Payment from local to national" is the money incurred by local public bodies under Article 17-2 of the Local Finance Law (among the settled accounts of local expenditure, the total sum of cash payment to the national government related to obligatory share of public works directly carried out by the national government, and the amount of the redemption of the principal and interest of public compensation bonds paid to the national government are included).

Note 5 : The amounts of settled accounts exclude the subsidy for the redemption of public works loans financed by specific funds and the redemption money which is offset by this subsidy.

The definition of “cities” given here applies to all cities except Ordinance-designated cities, core cities, and special case cities. Cities with a population of 100,000 or more are referred to as medium-sized cities, and cities with a population below 100,000 are referred to as small cities.

To obtain the status of a city, a town or a village must meet the requirements (to have a population of 50,000 or more etc.) stipulated in Article 8, Paragraph 1 of the Local Autonomy Law. 特別区は、基礎的な地方公共団体として、同法第 281 条の 2 第 1 項で都が一体的に処理することとされている事務を除き、同法第 2 条第 3 項において市町村が処理するものとされている事務を処理する。

The term “special wards” denotes wards located within the Tokyo Metropolitan Government jurisdictional area, as provided for in Article 281, Paragraph 1 of the Local Autonomy Law. Currently, there are 23 special wards.

Special wards undertake, as basic local public bodies, all the functions of municipalities prescribed in Article 2, Paragraph 3 of the Law, except for those functions which shall be administered by Tokyo Metropolitan Government in a unified manner according to Article 281-2, Paragraph 1 of the Law.

○ 決算統計基本用語

Basic terms in annual account settlement statistics

9 普通会計

Ordinary account

地方公共団体における地方公営事業会計以外の会計で、一般会計のほか、特別会計のうち地方公営事業会計に係るもの以外のものの純計額。

個々の地方公共団体ごとに各会計の範囲が異なっているため、財政状況の統一的な掌握及び比較が困難であることから、地方財政統計上便宜的に用いられる会計区分。

The term “ordinary account” denotes an account of local public bodies excluding the local public businesses account; it is calculated as the net total amount of the general account and all special accounts except those classified in the local public businesses account.

Because each local public body defines the limits of the general account and special accounts differently, it is hard to grasp its financial condition and make a comparison in a unified manner by using this type of accounting division method. Therefore, the concept of “ordinary account” is used for the sake of convenience in local financial statistics.

10 地方公営事業会計

Local public businesses account

地方公共団体の経営する公営企業、国民健康保険事業、老人保健医療事業、後期高齢者医療事業、介護保険事業、収益事業、農業共済事業、交通災害共済事業及び公立大学附属病院事業に係る会計の総称。

The term “local public businesses account” denotes a general term for the accounts related to such public businesses as are managed by local public bodies as local public enterprises, namely national health insurance, health and medical care for the elderly, medical care for the latter-stage elderly, elderly care insurance, profit-making activities, agricultural mutual aid, traffic accident mutual aid, and hospitals attached to public universities.

11 決算額

Amount of settled accounts

特に断りのない限り、普通会計に係る地方財政の純計額。

Unless otherwise defined, the term “amount of settled accounts” denotes the net total amount of settled accounts related to the ordinary account of local governments.

12 地方財政純計額、純計決算額又は純計

Net total amount of settled accounts of local governments, or Net total amount of settled accounts

都道府県決算額と市町村決算額を単純に合計して財政規模を把握すると地方公共団体相互間の出し入れ部分について重複するため、この重複部分を控除して正味の財政規模を見出すことを純計という。

したがって、都道府県決算額と市町村決算額の合計額は地方財政の純計額に一致しないことがある。

The simple sum of the amounts of prefectural settled accounts and municipal settled accounts does not reflect the precise scale of local public finance because of the duplication caused by money transferred from one local government to another. The term “net total amount of settled accounts” obtained by deducting these duplications, is used to grasp the real scale.

Therefore, the sum of the amounts of prefectural settled accounts and municipal settled accounts may not be the same as the net total amount of settled accounts of all local governments.

13 市町村決算額

Amount of municipal settled accounts

政令指定都市、中核市、特例市、都市、町村、特別区、一部事務組合及び広域連合における決算額の単純合計額から、一部事務組合及び広域連合とこれを組織する市区町村との間の相互重複額を控除したもの。

The term “amount of municipal settled accounts” denotes the amount calculated by deducting the duplication between the settled accounts of partial-affairs-associations or those of wide area unions and the settled accounts of their member municipalities (including special wards) from the simple sum of the amounts of settled accounts of Ordinance-designated cities, core cities, special case cities, other cities, towns and villages, special wards, partial-affairs-associations and wide area unions.

14 形式収支

Gross balance of the settled accounts

歳入決算総額から歳出決算総額を差し引いた歳入歳出差引額。

The term “gross balance of the settled accounts” denotes a balance between revenue and expenditure. It is calculated by deducting the total amount of settled accounts for expenditure from the total amount of settled accounts for revenue.

15 実質収支

Net balance of settled accounts

当該年度に属すべき収入と支出との実質的な差額をみるもので、形式収支から、翌年度に繰り越すべき継続費繰次繰越（継続費の毎年度の執行残額を継続最終年度まで繰次繰り越すこと。）、繰越明許費繰越（歳出予算の経費のうち、その性質上又は予算成立後の事由等により年度内に支出を終わらない見込みのものを、予算の定めるところにより翌年度に繰り越すこと。）等の財源を控除した額。

通常、「黒字団体」、「赤字団体」という場合は、実質収支の黒字、赤字により判断する。

The term “net balance of settled accounts” denotes the real balance between revenue and expenditure during one fiscal year. It is calculated by deducting the funds to be carried forward to the next fiscal year as a reserve for continuing expenditure, and the expenses given budgetary approval to be brought forward (the amount in the expenditure budget which is not expended within the fiscal year in question, for example because of the nature of the expenditure, or because of some reasons arising after the budget was given final approval, and is carried forward by the budget to the next fiscal year) from the gross balance of the settled accounts.

Normally, whether a local government is in surplus or in deficit is concluded by the net balance of settled accounts.

16 単年度収支

Balance of settled accounts within a single fiscal year

実質収支は前年度以前からの収支の累積であるので、その影響を控除した単年度の収支のこと。具体的には、当該年度における実質収支から前年度の実質収支を差し引いた額。

The net balance of settled accounts for a specific fiscal year includes accumulated balances from the past, so it is necessary to exclude the effect of these past balances in order to see the balance of settled accounts in a single fiscal year. In concrete terms, "balance of settled accounts within a single fiscal year" denotes the net balance of settled accounts in a fiscal year minus that in the previous year.

17 実質単年度収支

Net balance of settled accounts within a single fiscal year

単年度収支から、実質的な黒字要素（財政調整基金への積立額及び地方債の繰上償還額）を加え、赤字要素（財政調整基金の取崩し額）を差し引いた額。

"Net balance of settled accounts within a single fiscal year" denotes a balance calculated by adding "surplus" factors (the amount reserved in the financial adjustment fund, and the amount of advanced redemption of local loans) to the balance of settled accounts in a single fiscal year, and subtracting from it "deficit" factors (the amount withdrawn from the financial adjustment fund).

○ 歳入 Revenue

18 一般財源

General revenue sources

地方税、地方譲与税、地方特例交付金等及び地方交付税の合計額。なお、これらのほか、都道府県においては、市町村から都道府県が交付を受ける市町村たばこ税都道府県交付金、市町村においては、都道府県から市町村が交付を受ける利子割交付金、配当割交付金、株式等譲渡所得割交付金、地方消費税交付金、ゴルフ場利用税交付金、特別地方消費税交付金、自動車取得税交付金及び軽油引取税交付金（政令指定都市のみ）を加算した額をいうが、これらの交付金は、地方財政の純計額においては、都道府県と市町村との間の重複額として控除される。

The term "general revenue sources" comprises local taxes, local transfer taxes, special local grant and similar grants, and local allocation tax. In the case of prefectures, "general revenue sources" also include the grant from municipal tobacco tax which is transferred from municipalities to prefectures, whereas in the case of municipalities, they include such transfers from prefectures as the grant from the interest-based prefectural inhabitant tax, the grant from the dividend levy of prefectural inhabitant tax, the grant from the levy on capital gain from stocks, the local consumption tax grant, the grant from tax on usage of golf facilities, special local consumption tax grant, automobile acquisition tax grant, and light oil delivery tax grant (only for Ordinance-designated cities). However, in calculating the net total of the settled accounts of local governments, these grants are deducted as duplications between prefectures and municipalities.

19 一般財源等

General revenue sources, etc.

一般財源のほか、一般財源と同様に財源の使途が特定されず、どのような経費にも使用できる財源を合わせたもの。目的が特定されていない寄附金や売却目的が具体的事業に特定されない財産収入等のほか、臨時財政対策債等が含まれる。

The term "general revenue sources etc." comprises general revenue sources and revenue sources which are not earmarked and can be used for any kind of expenses in the same way as general revenue sources. It includes donations which are not earmarked, revenues from property sales, the objectives of which are not specified, as well as an extraordinary financial measures loan.

20 地方消費税、地方消費税清算金

Local consumption tax, settlement payment of local consumption tax

平成9年4月に導入された道府県税であり、その賦課徴収は、当分の間、国が消費税と併せて行い、各都道府県に払い込むこととされている。また、各都道府県は、国から払い込まれた額を消費に相当する額に応じて、相互間で清算することとされている。

特に断りのない限り、都道府県間における清算を行った後の額を地方消費税として歳入に計上し、地方消費税清算金は歳入・歳出いずれにも計上していない。

The term “local consumption tax” denotes a prefectural tax introduced in April, 1997. For the present, the national government collects this tax along with national consumption tax, and remits it to prefectures. The amount paid to each prefecture is then settled among prefectures according to indicators representing the volume of consumption in each prefecture.

Unless otherwise stipulated, the amounts after settlement among prefectures are used as revenue from local consumption tax, and settlement payment of local consumption tax is not included either in revenues or in expenditures.

21 地方譲与税

Local transfer tax

国税として徴収し、そのまま地方公共団体に対して譲与する税。地方公共団体の財源とされているものについて、課税の便宜その他の事情から、徴収事務を国が代行している。

現在、地方道路税の収入額の全額を都道府県及び市町村に対して譲与する地方道路譲与税、石油ガス税の収入額の2分の1の額を都道府県及び政令指定都市に対して譲与する石油ガス譲与税、特別とん税の収入額の全額を開港所在市町村に対して譲与する特別とん譲与税、自動車重量税の収入額の3分の1の額を市町村に対して譲与する自動車重量譲与税、航空機燃料税の収入額の13分の2の額を空港関係市町村及び空港関係都道府県に対して譲与する航空機燃料譲与税がある。なお、平成21年度に地方法人特別税の収入額の全額を都道府県に対して譲与する地方法人特別譲与税が創設された。

The term “local transfer tax” denotes a tax collected as a national tax, and directly transferred to local public bodies. As a matter of taxation convenience or for other reasons, the national government, acting on behalf of local public bodies, collects what are regarded by their nature as revenue sources of local public bodies.

Currently, there are local transfer taxes as follows : local road transfer tax is a transfer of the total amount of revenue from local road tax to prefectures and municipalities, petroleum gas transfer tax is a transfer of half of the revenue from petroleum gas tax to prefectures and large cities, special tonnage transfer tax is a transfer of the total amount of revenue from special tonnage tax to municipalities where harbors engaged in foreign trade are located, motor vehicle tonnage transfer tax is a transfer of one third of motor vehicle weight tax to municipalities, and aviation fuel transfer tax is a transfer of two thirteenths of aviation fuel tax to municipalities housing airport sites and facilities and to the prefectures concerned. In FY 2009, corporation local special transfer tax, which is a transfer of the total amount of revenue from corporation local special tax to prefectures, was established.

標準的団体（人口、面積、行政規模が道府県や市町村の中で平均的で、積雪地帯や離島等、自然的条件や地理的条件等が特異でない団体）が合理的、かつ妥当な水準において地方行政を行う場合等の一般財源所要額を、測定単位 1 単位当たりで示したものの。

The term “unit cost” denotes an amount of general revenue sources expressed as per unit of service which may be needed in the cases where a local public body under standard conditions (a local public body whose population, area, and scale of administration are on an average level among prefectures or municipalities, and where the natural or geographical conditions are not exceptional as in the cases of snowy areas or isolated islands) renders local administrative services at a reasonable and acceptable level.

67 測定単位 Unit of service

道府県や市町村の行政項目（河川費や農業行政費等）ごとにその量を測定する単位。例えば、河川費においては河川の延長が用いられる。

The term “unit of service” denotes a unit of quantity which is used in measuring separately the quantity of each classification of services of prefectures or municipalities (e.g. river expenses, agricultural administration expenses). For instance, the length of a river within the area of a local public body is used as a unit of service for river expenses.

68 補正係数 Adjustment coefficients

すべての道府県や市町村に費目ごとに同一の単位費用が用いられるが、実際には自然的・地理的・社会的条件の違いによって大きな差があるので、これらの行政経費の差を反映させるため、その差の生ずる理由ごとに測定単位の数値を割り増し又は割り落とししている。これが測定単位の数値の補正であり、補正に用いる乗率を補正係数という。

Although the same figures denoting unit costs for the classification of administrative services are applied to all prefectures or municipalities uniformly, there are wide differences in administrative costs among local public bodies under different natural, geographical, or social conditions. Therefore, in order to reflect those differences properly, the figures denoting units of service are increased or decreased according to the causes of the differences. This process is referred to as adjustment of the figures denoting the unit of service, and the multiplying rates used for such adjustment are called “adjustment coefficients.”

69 基準財政収入額 Basic financial revenues

普通交付税の算定に用いるもので、各地方公共団体の財政力を合理的に測定するために、標準的な状態において徴収が見込まれる税収入を一定の方法によって算定するものであり、次の算式により算出される。

$$\text{標準的な地方税収入} \times 75 / 100 + \text{地方道路譲与税等}$$

“Basic financial revenues” are used in the calculation of ordinary local allocation tax. For the rational measurement of the financial ability of each local public body, local tax revenues which may be collected under standard conditions are estimated by a certain method, and the computation formula is as follows;

$$\text{Standard local tax revenues} \times 75 / 100 + \text{Local road transfer taxes, etc.}$$

70 留保財源

Reserved revenue sources

基準財政収入額の算定においては、法定普通税等の税収見込額の全額を算入対象とせず、基準税率を乗じてその一部を算入しているが、この基準財政収入額に算入されなかった税収入は、地方交付税の算定上捕捉されず、各地方公共団体に留保されることから、留保財源と呼ばれている。なお、留保財源率は都道府県、市町村とも税収見込額の25%とされている。

In the calculation of basic financial revenues, not all of the expected amount of revenue from local taxes defined in the Local Tax Law is included, but a part of the amount is included by applying standard tax rates. The remaining portion of tax revenues which has not been included in basic financial revenues is referred to as reserved revenue sources, as it is not reflected in the calculation of local allocation tax and is reserved for each local public body. The reserved revenue sources percentage for both prefectures and municipalities is 25% of the expected amount of local tax revenues to 25% in FY2003, which fixed the percentage for both prefectures and municipalities at 25%.

71 ラスパイレス指数

Laspeyres index

加重指数の一種で、重要度を基準時点(又は場)に求めるラスパイレス式計算方法による指数。ここでは、地方公務員の給与水準を表すものとして、一般に用いられている国家公務員行政職(一)職員の俸給を基準とする地方公務員一般行政職職員の給与の水準を指す。

Laspeyres Index is a type of fixed-weight index, and is calculated by the Laspeyres formula which uses the base period or the base point as a weighted factor. In the context here, it is used as an indicator of the salary level of local public personnel and, as is generally the case, shows the comparative salary level of general administration service personnel in local public bodies compared to that of national public personnel to whom the Salary Schedule for Administrative Services (I) is applied.

1. 地方財政健全化の推進

Promotion of the Soundness of Local Public Finance

地方公共団体の財政の健全化に関する法律等の概要

Law Relating to the Financial Soundness of Local Governments, etc.

地方債の償還や高齢化の進展等により、厳しい財政状況にある中で、各地方公共団体は、住民ニーズを踏まえた自律した財政運営を行うことが求められています。また、今後、地域主権を進めていくためにも、地方公共団体の財政規律を確立することは極めて重要です。

旧来の地方公共団体の財政再建制度は、一般会計等の実質赤字というフローの指標のみを用いており、申出により再建を行う仕組みである等の課題が指摘されていました。

そこで、地方公共団体の財政再建制度を約 50 年ぶりに抜本的に見直し、財政指標の整備とその開示を徹底し、財政の早期健全化及び再生を図るための新たな制度として平成 19 年 6 月に「地方公共団体の財政の健全化に関する法律」（平成 19 年法律第 94 号）が成立しました。財政指標の公表については平成 20 年 4 月から、財政健全化計画の策定の義務付け等の規定については平成 21 年 4 月から施行されています。

Amid severe financial conditions caused by such factors as the redemption of local bonds and the advance of aging, local governments are required to conduct autonomous financial management that takes into account the needs of local residents. Furthermore, it is extremely important to establish the financial discipline of local governments in order to promote local power from now on.

The conventional system for the reconstruction of local government finances only used flow indexes for the real deficit, such as the general account, and various problems were pointed out, such as the fact that this was a mechanism for reconstruction through application.

Therefore, the present system of local government financial reconstruction was drastically revised for the first time in about 50 years, and in June 2007 the Law Relating to the Financial Soundness of Local Governments (2007, Law No. 94) has been enacted as a new system to thoroughly establish and disclose financial indexes and to strive for the early soundness and rebuilding of financial affairs. Financial indexes have been in force since April 2008 and regulations concerning the duty to formulate financial soundness plans, etc., have come into force since April 2009.

指標の説明 Explanation of financial indices

○ 財政力指数 Financial capability indicator

地方公共団体の財政力を示す指数で、基準財政収入額を基準財政需要額で除して得た数値の過去3年間の平均値。財政力指数が高いほど、普通交付税算定上の留保財源が大きいことになり、財源に余裕があるといえる。

The term “financial capability indicator” is used to indicate the financial strength of local public bodies, and is calculated as the past three year average of the figures derived from dividing basic financial revenues by basic financial needs. A higher figure for the financial capability indicator means that the local public body can be said to have a greater margin for revenue sources.

○ 経常収支比率 Ordinary balance ratio

地方税、普通交付税のように用途が特定されておらず、毎年度経常的に収入される財源のうち、人件費、扶助費、公債費のように毎年度経常的に支出される経費に充当されたものが占める割合。

The term “ordinary balance ratio” is calculated as a percentage in relation to the total amount of the sum total of revenue sources which are not earmarked and can be ordinarily raised or received every fiscal year, as represented by local taxes and ordinary local allocation tax, of those revenue sources which are used for expenditures that are ordinary disbursed every fiscal year such as the personal expenses, social assistance expenditure, and debt sources.

$$\text{経常収支比率} = \frac{\text{人件費、扶助費、公債費等に充当した一般財源等}}{\text{経常一般財源等(地方税 + 普通交付税等) + 減税補てん債 + 臨時財政対策債}} \times 100$$

$$\text{Ordinary balance ratio} = \frac{\text{Amount of general revenue used for personnel expenses, social assistance expenditures, debt service, etc.}}{\text{Ordinary general revenues (local taxes + ordinary local allocation tax, etc.) + tax cut compensation loan + extraordinary financial measures loans}} \times 100$$

○ 実質公債費比率 Real debt service ratio

当該地方公共団体の一般会計等が負担する元利償還金及び準元利償還金の標準財政規模に対する比率の過去3年間の平均値で、借入金（地方債）の返済額及びこれに準じる額の大きさを指標化し、資金繰りの程度を表す指標のこと。

「地方公共団体の財政の健全化に関する法律」における早期健全化基準については、市町村・都道府県とも、地方債協議制度において一般単独事業の許可が制限される基準である25%とし、財政再生基準については、市町村・都道府県とも、地方債協議制度において公共事業等の許可が制限される基準である35%としている。

Real debt service ratio is calculated as the past three-year average of the ratio of redemption and quasi-redemption of principal and interest which general account, etc. of the local government concerned bear to the total of the standard financial scale. This ratio is an indicator of the amount of repayment and quasi-repayment of borrowings (local government loans); it shows financing of the local government concerned.

This ratio is used as the index of soundness in “Law Relating to the Financial Soundness of the Local Governments.” The early financial soundness criterion for municipalities and prefectures is 25%, used as a criterion of restricting permission for unsubsidized general public works under the local government bond consultation system; the financial rebuilding criterion for municipalities and prefectures is 35%, used as a criterion of restricting permission for subsidized public works under the consultation system.

$$\text{実質公債費比率} = \frac{(A + B) - (C + D)}{E - D}$$

$$\text{Real debt service ratio} = \frac{(A+B) - (C+D)}{E-D}$$

○ 将来負担比率 Future burden ratio

地方公社や損失補償を行っている出資法人等に係るものも含め、当該地方公共団体の一般会計等が将来負担すべき実質的な負債の標準財政規模に対する比率のこと。

地方公共団体の一般会計等の借入金（地方債）や将来支払っていく可能性のある負担等の現時点での残高を指標化し、将来財政を圧迫する可能性の度合いを示す指標ともいえる。

「地方公共団体の財政の健全化に関する法律」における早期健全化基準については、実質公債費比率の早期健全化基準に相当する将来負担額の水準と平均的な地方債の償還年数を勘案し、市町村（政令指定都市は除く）は 350%、都道府県及び政令指定都市は 400%としている。

Future burden ratio is calculated as the ratio of substantial debts which general account, etc. of the local government concerned bear in the future, including debts by local public corporations or other corporations, etc. in which it has invested and for which it has promised compensation for losses, to the total of the standard financial scale.

This ratio is an indicator of the current outstanding of borrowing (local government loans) of general account, etc. and possible burden paid by a local government in the future; it shows the degree of possibility of future pressure on finance.

This ratio is used as the index of soundness in “Law Relating to the Financial Soundness of the Local Governments”; the early financial soundness criterion is 350% and 400% for municipalities (except ordinance-designated cities) and prefectures and ordinance-designated cities respectively, considering the level of future burden amount corresponding to the early financial soundness criterion of real debt service ratio and average years of redemption of local government loans.

$$\text{将来負担比率} = \frac{A - (B + C + D)}{E - F}$$

○ ラスパイレス指数 Laspeyres index

国家公務員行政職俸給表（一）の適用者の俸給月額を 100 とした場合の地方公務員一般行政職の給与水準。

職員構成を学歴別、経験年数別に区分し、地方公共団体の職員構成が国の職員構成と同一と仮定して算出するものであり、地方公共団体の仮定給料総額（地方公共団体の学歴別、経験年数別の平均給料月額に国の職員数を乗じて得た総和）を国の実俸給総額で除して得る加重平均。

Laspeyres index is an index indicating the comparative salary level of general administration personnel in local public bodies, calculated by taking the monthly salary of national public personnel to whom the Salary Schedule of Administrative Services (I) is applied as 100. As the method of calculation, local public personnel are classified by their academic careers and years of experience in service, and the composition of local public personnel defined in this way is then assumed to be the same as that of national public personnel. So this index is a weighed average calculated by dividing the hypothetical total amount of the monthly salary of local public personnel (sum total of the average monthly salary for each classification defined by academic careers and years of experience in service, multiplied respectively by the number of national public personnel in each classification) by the actual total amount of the monthly salary of national public personnel.

IV 第三セクター等の統廃合等の状況 (平成20年度中)

Abolition and consolidation of joint third sector bodies (during FY 2008)

- ・ 第三セクター等の統廃合等の状況をみると、平成20年度中に廃止が188件、統合が22件（統合前44法人、統合後22法人）、出資引き揚げが34件となっています。
- ・ その理由をみると、廃止の場合は「既に事業の目的を達成しているため」、統合の場合は「組織の効率化、経営の合理化等のため」、出資引き揚げの場合は「経営上、公的関与の必要性がなくなったため」が最も多くなっています。
- ・ Looking at the abolition and consolidation of joint third sector bodies, we can find 188 cases of abolitions, 22 cases of consolidations (44 corporations before consolidation, and 22 corporations after consolidation), and 34 cases of withdrawal of investment.
- ・ The major reasons for these various cases are “the purpose of the enterprise has been achieved” in the case of abolitions, “structural efficiency and administrative rationalization” in the case of consolidations, and “no longer a need for strong public involvement” in the case of withdrawal of investment.

2 東京都の収入については、都が徴収する市町村税相当分は道府県税収入から控除して市町村税収入として加算した。

3 各項目毎に四捨五入しており、合計と一致しないことがある。

Note 1 : The indices of per capita tax revenues are expressed as values relative to the national average of all prefectures equaling 100. Population is based on the basic register of residents, as of March 31st, 2009.

Note 2 : In the Tokyo Metropolitan Government row in this table, revenues from taxes ordinarily classified as municipal taxes but imposed and collected by Tokyo Metropolitan Government within the area of special wards are treated as municipal taxes and included.

Note 3 : The figures for "total" may not be equal to the exact sum of each item because each figure is rounded off in this table.

「明治の大合併」

近代的地方自治制度である「市制町村制」の施行に伴い、行政上の目的（教育、徴税、土木、救済、戸籍の事務処理）に合った規模と自治体としての町村の単位（江戸時代から引き継がれた自然集落）との隔たりをなくすために、町村合併標準提示（明治 21 年 6 月 13 日内務大臣訓令第 352 号）に基づき、約 300～500 戸を標準規模として全国的に行われた町村合併。結果として、町村数は約 5 分の 1 に。

“The mass amalgamations of the Meiji era”

Before the enforcement of the City Code and the “Town and Village Code” which aimed to establish a modern system of local administration, mergers of towns and villages were carried out nationwide by setting a standard of about 300-500 households in one town or village on the basis of the Announcement of the Standard for the Mergers of Towns and Villages (Home Minister Directive No. 352 issued on June 13, 1888), in order to enlarge the size of towns and villages at that time from a size that reflected that of natural communities in the Edo period to a size that was suitable for the effective administration of education, tax collection, public works, relief work, and the family register. As a result, the number of towns and villages decreased to about one-fifth.

「昭和の大合併」

戦後、新制中学校の設置管理、市町村消防や自治体警察の創設の事務、社会福祉、保健衛生関係の新しい事務が市町村の事務とされ、行政事務の能率的処理のためには規模の合理化が必要とされた。昭和 28 年の町村合併促進法（第 3 条「町村はおおむね、8000 人以上の住民を有するのを標準」）及びこれに続く昭和 31 年の新市町村建設促進法により、「町村数を約 3 分の 1 に減少することを目途」とする町村合併促進基本計画（昭 28 年 10 月 30 日閣議決定）の達成を図ったもの。約 8000 人という数字は、新制中学校 1 校を効率的に設置管理していくために必要と考えられた人口。昭和 28 年から昭和 36 年までに、市町村数はほぼ 3 分の 1 に。

“The mass amalgamations of the Showa era”

After World War II, administrative tasks such as the construction and management of junior high schools under the new education system, fire defense and police administration, and functions related to social welfare, health and sanitation, were newly assigned to municipalities, requiring rationalization of the size of municipalities so as to enable effective and efficient management of their tasks. The national government aimed to achieve the Basic Plan for the Promotion of the Mergers of Towns and Villages (decided by the Cabinet on October 30, 1953) which aimed at a decrease in the number of towns and villages to about one-third, as the Law for the Promotion of Mergers of Towns and Villages enacted in 1953, of which Article 3 provides that towns and villages shall have a population of about 8000 or more as a standard, and the Law for the Promotion of Construction of New Municipalities enacted in 1956 replacing the Merger Law. The population of about 8000 was taken as a target because it was considered necessary for a municipality to have such a population size as the minimum for the effective management of one junior high school. The number of municipalities actually decreased to about one-third between 1953 and 1961.
